

7.1.5 - Institution is committed to maintenance of cleanliness, sanitation, green cover and providing a pollution free healthy environment.

Response:

#### **Maintenance of Cleanliness, sanitation and green cover of the institution**

In today's world, environmental concerns have taken center stage, and institutions worldwide are recognizing their role in promoting cleanliness, sanitation, green cover, and a pollution-free environment.

#### **Cleanliness and Sanitation :**

Our institution places utmost importance on cleanliness and sanitation. Regular cleaning schedules, waste disposal management, and hygiene awareness campaigns are integral parts of our strategy. We maintain clean classrooms, hostels, and public areas, fostering a conducive learning environment. Sufficient equipment like brooms, mops are made available to use for the cleanliness work. Dustbins are kept in each classroom, office, staff cabins, library, language lab, passages etc.

Additionally, sanitation facilities are well-maintained and easily accessible to all, ensuring the well-being of our students and staff. Such efforts contribute significantly to the overall aesthetics and health of our campus. To sanitize the washrooms (toilets); disinfectants are made available by the institution. One maidservant is appointed to clean the toilets. All the washrooms are cleaned every day. To maintain the cleanliness in the washrooms; sufficient water supply is made available. Computers, key boards, mouse and other accessories related to the electronic devices are cleaned delicately by using brush to prevent from damage. The material kept in the Psychology lab, Sports room and Musical instruments are cleaned regularly by our peons so that students can make use of it whenever required.

#### **Green Cover and Sustainability :**

Our campus is situated in a clean and peaceful area. It is mostly pollution free as it is surrounded by plenty of trees. The college building is very spacious and there is no problem of ventilation. There is no any other industrial set up nearby the college campus. Entire campus is filled up with the plants and trees which makes the campus green. To promote a greener campus, we have initiated extensive tree planting and landscaping projects. These not only enhance the beauty of our institution but also contribute to biodiversity and combat pollution. Our commitment to sustainability extends to energy-efficient practices, Water conservation, and Waste reduction. Solar panels, Rainwater harvesting, and recycling programs are integral parts of our sustainability efforts. These endeavors not only reduce our carbon footprint but also with emphasis on environmental responsibility.

### **Pollution Control Measures –**

The institution has taken proactive measures to control pollution. Our transportation system encourages carpooling and the use of eco-friendly vehicles. Furthermore, emissions from generators and industrial processes are monitored and controlled to minimize air pollution. Waste segregation and proper disposal practices are enforced, minimizing soil and water pollution. These efforts demonstrate our commitment to a pollution-free environment.

### **Promoting a Healthy Environment–**

A pollution-free and green environment leads to improved health. We offer wellness programs, sports facilities, and promote physical activities to ensure our students and staff lead healthy lives. The institution also emphasizes mental health through counseling services and stress management programs. Clean air and a serene atmosphere foster mental and physical well-being. Our college campus is clean, healthy and pollution free. We conducted a cleanliness drive in our college on the occasion of SantGadgebabaJayanti.

Our institution's commitment to cleanliness, sanitation, green cover, and a pollution-free healthy environment reflects our dedication to providing a world-class learning experience.
