

# Conservation of energy in college

## Electric energy Conservation -

- One of the best energy saving device is the light switch. Turn off light when not required.
- Energy saving is the need of the hour so saving energy is very important.
- To save light energy, we have installed some instruction boards in the college with light advice. So that while the electricity is used only as much as necessary and electric energy is saved.

## Water Conservation

## Rain Water collecting tank

- Saving water is the need of the hour.
- We have implemented a very nice initiative in our college under the Green Club.
- In which the rain water that collects on the uppermost terrace of the college is collected in a tank through a pipeline and used to water other plants.

#### **Solar energy conservation-**

- The institution aims to harness solar energy to meet a substantial portion of its power needs. Solar panels will be installed on rooftops and open spaces.
- Ashokrao Mane Group of Institutions is a branch of our institution and our college is affiliated to this branch with MOU.

**Various Policies implemented to keep**  
**Campus clean, green and plastic free**

The institution believes in making stakeholders environmentally conscious and social responsible citizens of the nation.

Hence, following rules are made to reduce the use of non-reusable plastic in the campus as well as to keep campus clean and green.

- "Do not use non-reusable plastic in college premises."
- Students can make eco-brick with the help of non-reusable plastic wrappers and bottles.
- Faculty members and students are allowed to use only reusable plastic bottles or steel bottles for drinking water.
- Staff can use only glass, ceramic or steel cups, cutlery and containers; do not throw any plastic garbage in the campus.
- Do not use stationary material like use and throw pens, plastic folders and plastic bags in the college premises.
- Create awareness for cultivation of indigenous plant varieties in the campus.
- Motivate students for tree plantation and to create awareness regarding environment protection through various activities.
- For conservation of energy resources, all the students and staff members are encouraged to utilize bicycles, public vehicles etc.
- Eco-friendly events - Use digital invitations, reduce paper waste and ensure proper waste disposal at events.
- College students should plant at least one tree in their surrounding area at every month and send its photo. This is the best activity for green environment.

**I/C Principal**  
**College of Education (B.Ed.)**  
**Peth Vadgaon, Kolhapur**

A Green Club has been established in the college under which various activities are carried out to conserve energy. In internship Period College students undertake various activities under the Green Club in their Internship School.

### Use of bicycles or E- Vehicles

We suggest using e-bikes or bicycles in the college to save energy.
